- A. objects inherit the properties of the class
- B. classes are defined based on the attributes of the object
- C. objects can belong to two classes
- D. classes are always different

5: Design phase includes?

- A. data,architectural and procedural designs only
- B. architectural,procedural and interface design only
- C. data,architectural and interface design only
- D. data,architectural interface and procedural design

6: Data structure suitable for an application discussed in?

- A. data design
- B. architectural design
- C. procedural design
- D. interface design

7: Design phase will usually be?

- A. top-down
- B. bottom-up
- C. random
- D. center fingring

8: Assertion and condition which are true at the point of execution

- A. always
- B. sometimes
- C. many times
- D. no times

9: What is meant by a dedicated computer?

- A. Which is used by one person only
- B. Which is assigned one and only one task
- C. Which uses one kind of software
- D. Which is meant for application software

10: The name for the way that computers manipulate data into information is called:

- A. programming
- B. processing
- C. organizing
- D. storing

11: White box testing, a software testing technique is sometimes called ? -

- A. Glass box testing
- B. white box testing
- C. Black box
- D. basic path

12: Small business owners who want software to assist in managing accounts payable and receivable will likely use which of the following software products?

- A. Business Plan Pro
- B. Microsoft Project
- C. Quicken
- D. Quickbooks

13: Individuals who want software to assist in automated checkbook balancing and bill paying for their personal bank and credit card accounts will likely use which of the following software products?

- A. Quickbooks
- B. Quicken
- C. Microsoft Project
- D. Acrobat

14: Quicken and TurboTax are both personal financial products developed by:

- A. Intuit
- B. Microsoft
- C. Corel
- D. Adobe

15: A speech recognition system's codebook values are matched against a database of \_\_\_\_\_ as an early step in word construction.

- A. Samples
- B. Words
- C. Codes
- D. Phonemes

**16:** For which of the following tasks would PIM software be most useful?

- A. Keeping Track Of Recipes
- B. Calculating A Budget
- C. Drafting A Memo
- D. Maintaining A Schedule

**Explanation:** A personal information manager (often referred to as a PIM tool or, more simply, a PIM) is a type of application software that functions as a personal organizer. A PIM tool's purpose is to facilitate the recording, tracking, and management of certain types of "personal information".

**17:** The menu option to delete all the list present in the Recycle Bin is :

- A. Fill Delete
- B. Restore
- C. Empty Recycle Bin
- D. Full Recycle Bin

**18:** A computer checks the----- of user names and password for a match before granting access.

- A. website
- B. database
- C. network
- D. backup file

**19:** FPI stand for -----

- A. Frames per inch
- B. Film per inch
- C. Faults Per inch
- D. Figure per inch
